

■ Timothy Ali

PRODUCT DESIGNER WHO SHIPS IN CODE

Denver, CO · studio@timothyali.com · timothyali.com · linkedin.com/in/timothyali · github.com/tasyusef

SUMMARY

Product designer and front-end developer: I design interfaces and build them in TypeScript, Next.js, and SvelteKit. Since 2019, I've worked with founders and engineers on small teams and shipped three products of my own, including an XRP Ledger analytics platform I built and ran solo, now open source. Open to full-time or contract.

EXPERIENCE

Digital Designer (Contract), DOMOTO Mar 2026 – present

- Design and build a multi-brand design-system platform in JavaScript that keeps each client's tokens, components, and brand assets in one place, readable by client teams and AI tools.
- Design brand, print, and digital work for agency clients, including Fortune 500 companies.

Product Designer and Front-End Developer (Cofounder), Pocketwatch 2026

- Owned product, brand, UI, and the SvelteKit front end of a personal finance app; my partner built the backend.
- Launched with Stripe billing; closed in 2026: too costly to run, and we never worked out how to market it.

Designer and Developer (Sole Creator), Sonde 2025 – 2026

- Designed, built, and ran an XRP Ledger explorer with analytics, wallet scoring, fund tracing, and an AI research assistant: Next.js, TypeScript, PostgreSQL, ClickHouse, Neo4j, live WebSocket feeds.
- Closed the hosted app when costs outran subscription revenue; released the code at github.com/tasyusef/sonde_os.

Cofounder, Brand and Art Direction, PARC (Pixel Ape Rowboat Club) Nov 2021 – present
NFT club on the XRP Ledger.

- Designed and built parcxrpl.com in SvelteKit: live collection stats, a gallery, and a playable rowing game.
- Led the 2026 rebrand: logo, five-color palette, and PARC Pixel, a custom typeface in three weights.

Brand Designer, First Ledger Jan 2024 – Jan 2025
XRP Ledger trading platform. Platform scale, mid-2026: \$1.2B volume, 165K peak users, 2M+ wallets, 42K+ audience.

- Designed the logo, type system, brand guidelines, and co-branding layouts for the bot, web app, and marketing.

Founding Designer (Cofounder), xrp.cafe Jun 2021 – Jan 2024
NFT marketplace on the XRP Ledger. Platform scale, mid-2026: 32K followers, \$16.2M volume, 6.7M transactions.

- Cofounded the marketplace; designed its identity, mascot, and motion, ten-plus campaigns, and event booths.

Founder and Designer, Timothy Ali Design Ltd. Nov 2019 – present
Independent studio: identity, motion, and web design for startups and small businesses.

- [Jade Aesthetics](#) (2025 – present): a medical spa's site in Next.js with 16 treatment pages on one template.
- [FirstStrike Research](#) (2025): identity for a financial research blog: wordmark, color, type, and guidelines.

PROJECTS

- [Toolbox](#) (2026). Designed and built a macOS and Linux app for brand deliverables, with a CLI and an MCP server.

SKILLS

Product: interface design, design systems, prototyping, information architecture, data-heavy UI, motion.

Code: TypeScript, Next.js, SvelteKit, Electron, Tailwind; PostgreSQL, ClickHouse, Neo4j; WebSockets; Claude Code.

Brand and tools: identity systems, type design, art direction; Figma, Illustrator, After Effects, Photoshop, InDesign.

Languages: English and Spanish, both native.

EDUCATION

BFA, Graphic Design, Rocky Mountain College of Art + Design, Lakewood, CO

Oct 2025
